

MODEL 3500

PRESSURE VENT WITH PIPE-AWAY

OVERVIEW

The Model 3500 inline conservation pressure relief vent is designed for use on atmospheric and low-pressure storage tanks where pressure relief is required.

SPECIAL FEATURES

Maintains Accurate Settings:

Minimum setting available is approximately 0.25 OZ/IN² for pressure relief. Maximum setting upwards to 2.5 psig for pressure, see Set Point Limits Table 4. If higher settings are required, see Valve Concepts Series 4000 Spring Loaded Vents or Valve Concepts Series 5000 Pilot Operated Vents. All vents are tested to Valve Concepts, Inc. high standards for both leakage and set point prior to shipment. A certified test certificate is included with each vent verifying the accuracy of the pressure setting and leakage. The leakage rate meets or exceeds API Std 2000.

Condensate Drainage:

Self-draining body and specially designed seat ring keeps condensate away from seating surfaces, preventing freezing, binding and clogging.

Air-Cushioned Seating:

Air-cushion seating provides tight sealing to reduce evaporation losses and the release of toxic vapors. The pallets have outer guiding and center stabilizing stem to provide self alignment and tight seating.

Sizes-Connections:

Available in sizes 2" (DN50) through 12" (DN300). Carbon steel and stainless steel vents have raised face tank connection flanges. All other vent materials come standard with flat face flanges. Standard flanged bolt patterns are available to mate with ASME 150, PN16, or PN10 flanged connections.

* Derakane 470 and Hetron 800 are registered trademarks of Ashland, Inc.

TECHNIQUE

Weight loaded pallets in the vent housing allow the escape of vapors as the tank outbreathes due to thermal changes and product movement into the tank.

MODEL 3500

LINE SIZES AVAILABLE

2" (DN50), 3" (DN80), 4" (DN100), 6" (DN150), 8" (DN200), 10" (DN250), 12" (DN300)

COMMON APPLICATIONS

ATMOSPHERIC AND LOW PRESSURE STORAGE TANKS WHERE PRESSURE RELIEF IS REQUIRED

DESIGN PRESSURE

MULTIPLE SET PRESSURE RANGES AVAILABLE

CONSTRUCTION

Housing Material:	Available in aluminum, carbon steel, 316 stainless steel or corrosion resistant fiberglass reinforced plastic (FRP) with Derakane 470* or Hetron 800* resins	Pallet Assemblies:	Replaceable 316 stainless steel pallet assemblies are standard for metal vents. Pallet assemblies lower than 0.5 OZ/IN ² may contain a polycarbonate pallet material. Replaceable FRP pallet assemblies match the body resin material.
Seat Rings:	Replaceable metal seat rings available in aluminum or 316 stainless steel. FRP vents have integral seats that match the body resin material.	Pallet Diaphragms:	Standard diaphragm material is FEP film. Also available in FKM, EPDM, and Buna-N.

STANDARD/GENERAL SPECIFICATIONS

Gaskets:	Expanded PTFE for FEP diaphragm materials. Gasket materials match the diaphragm materials for BUNA-N, EPDM, and FKM.	Calibration Certificate:	Calibration certificates are issued standard with every line item demonstrating acceptable set point accuracy and seat leakage rates.
Set Point Accuracy:	Pressure setpoints are calibrated to be within +/-2% of customer requested setting across the range of available settings.	Painting:	All carbon steel surfaces are epoxy coated VCI blue per Cashco specification S-1777. Flange mating surfaces, threaded holes, and corrosion resistant parts are excluded. Non-coated surfaces have lubricant applied for corrosion prevention.
Seat Leakage:	Meets or exceeds current edition of API Standard 2000. Tighter seat leakage requirements available upon request.		

OPTION SPECIFICATIONS

Flame Screen:	Replaceable 30x30 stainless steel mesh screen with integral gasket that inserts between the outlet flange and goose neck. The outlet flame screen is not a suitable replacement for applications requiring deflagration or detonation arrestors.	Oxygen Cleaning:	All components oxygen cleaned, bagged, and tagged in accordance to Cashco specification S-1134. Must select 316 stainless steel body material and stainless steel loading weights.
Sizing Report:	Formal report documenting tank breathing requirements and vent performance per customer application. Displacement flow requirements and vent performance are in accordance with the current edition of API 2000 Std.	ATEX 2014/34/EU:	Available for IIB gases only. See Model 3500 IOM for more details.
NACE Certification:	Internal wetted portions meet NACE standard MR0175 when exterior of the vent is not directly exposed to a sour gas environment, buried, insulated, or otherwise denied direct atmospheric exposure. Available for carbon steel or 316 stainless steel body materials only. Must be requested at time of order.	PED 2014/34/EU Certificate:	Sound Engineering Practice (SEP) certificate available for pressures up to 0.5 barg.

2 - Polycarbonate pallet material may be used for settings less than 0.5 OZ/IN². All other parts are 316 SST.
3 - Carbon steel pallet weights are epoxy coated per Cashco specification S-1777.
4 - FRP encapsulated carbon steel utilizes same resin as body.
